

IILM UNIVERSITY

GREATER NOIDA

Internship Presentation

Python Programming

Submitted By: Dhruv Bhati

Program: B.Tech (Computer Science & Engineering), 4th Semester

Organization: CodSoft

Duration: 28/05/2026 – 28/06/2026 (4 Weeks)

About the Organization

CodSoft

CodSoft offers project-based virtual internships to students across technology domains such as Python Programming, Web Development, Data Science, Android Development, and Artificial Intelligence.

- ISO 9001:2015 Certified Organization
- Registered under MSME, Government of India
- Focus on practical, project-based learning

Internship Snapshot

4

Weeks Duration

Virtual

Mode of Internship

Python

Core Domain

CodSoft

Host Organization

Objectives of the Internship

1

Practical Exposure

Gain hands-on experience in Python programming beyond classroom learning.

2

Core Concepts

Strengthen understanding of data structures, control flow, functions, and OOP.

3

Build Projects

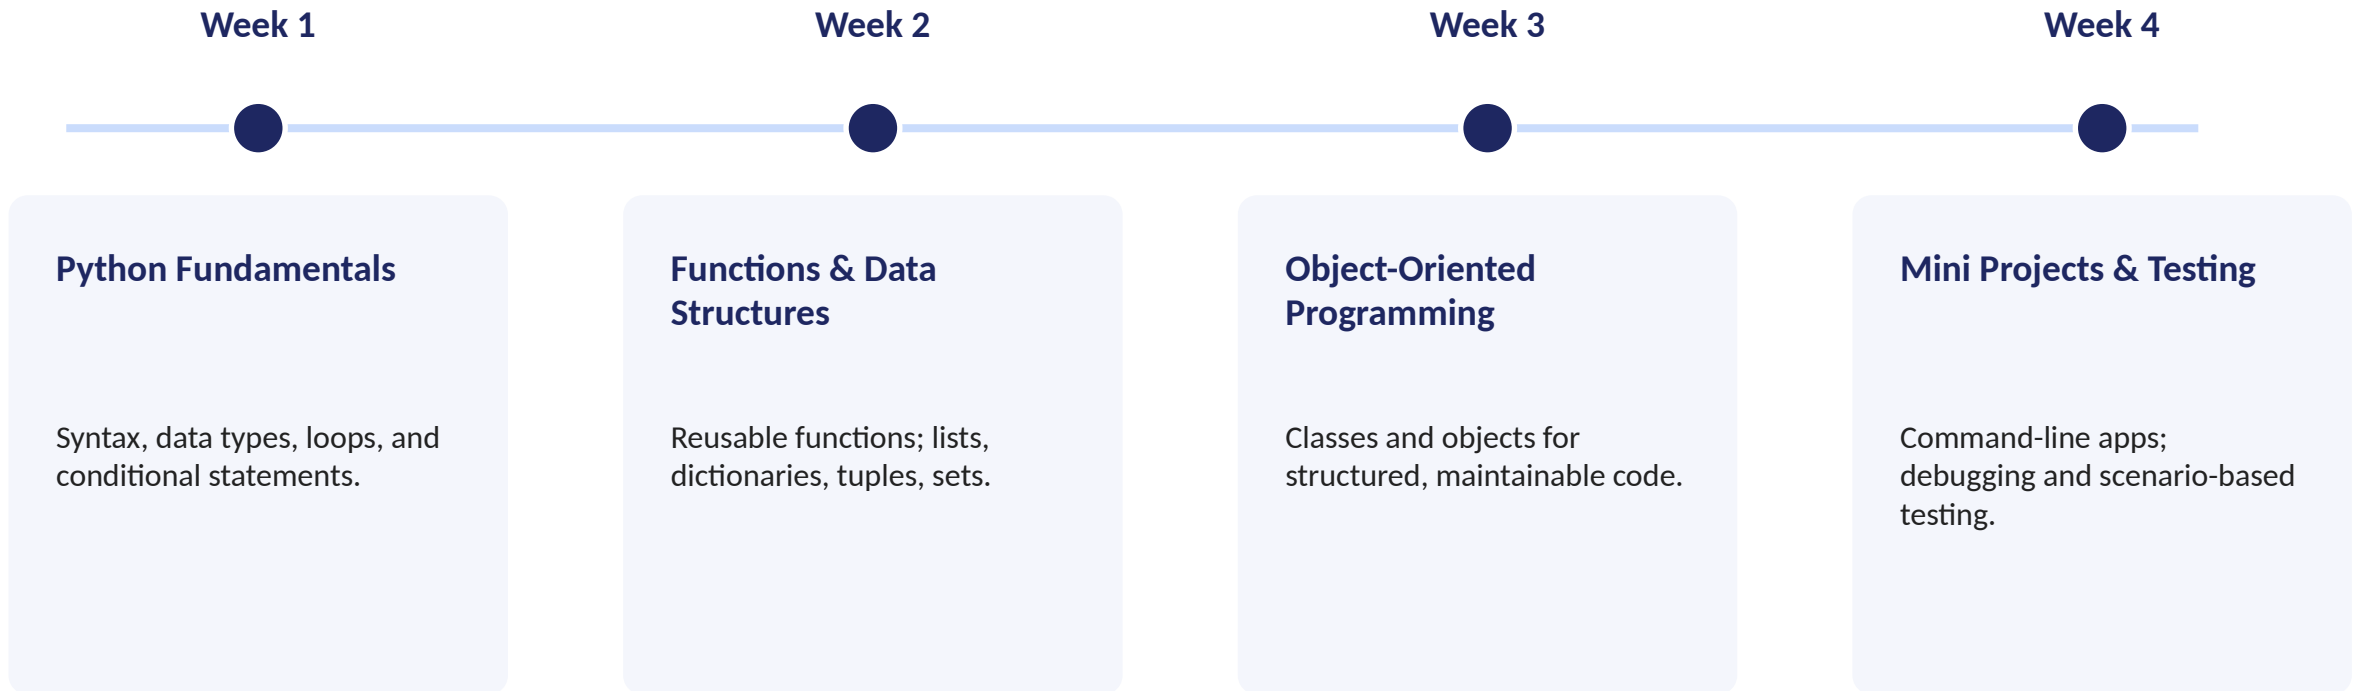

Develop small, functional Python applications as part of guided tasks.

4

Problem Solving

Improve debugging, logical reasoning, and independent work skills.

Work Undertaken — Weekly Progress

Learning Outcomes

- Stronger command over Python syntax and applied programming
- Improved ability to break problems into manageable components
- Systematic debugging and error-resolution skills
- Independent time and deliverable management in a remote setting
- Greater confidence to take on new programming challenges

Certificate of Completion

Conclusion

The four-week virtual internship in Python Programming at CodSoft strengthened both technical proficiency and problem-solving ability, translating classroom knowledge into practical, hands-on skills.

This experience has laid a strong foundation for future academic and professional pursuits in computer science and software development, complementing the ongoing B.Tech (CSE) program at IILM University, Greater Noida.

Thank You
