

IILM UNIVERSITY

GREATER NOIDA

INTERNSHIP REPORT

on

Python Programming

Submitted in partial fulfilment of the requirement for
Bachelor of Technology (Computer Science & Engineering)

Submitted By:

Dhruv Bhati

Program:

B.Tech (Computer Science &
Engineering)

Semester:

4th Semester

School of Computer Science and Engineering

IILM University, Greater Noida

2026

Certificate of Internship Completion

The internship completion certificate issued by CodSoft, confirming successful completion of the Python Programming virtual internship, is presented below.

Declaration

I, Dhruv Bhati, a student of B.Tech (Computer Science & Engineering), 4th Semester, at IILM University, Greater Noida, hereby declare that this Internship Report on “Python Programming” is an authentic record of the virtual internship undertaken by me at CodSoft from 28/05/2026 to 28/06/2026. The work presented in this report is original and has been carried out under the guidance provided by the organization during the internship period.

Acknowledgement

I would like to express my sincere gratitude to CodSoft for providing me the opportunity to undertake this virtual internship in Python Programming. I am thankful to the mentors and team at CodSoft for their guidance and support throughout the internship period. I would also like to thank the faculty of the School of Computer Science and Engineering, IILM University, Greater Noida, for their continuous encouragement and support in the successful completion of this internship.

1. Introduction

This report presents an account of the four-week virtual internship undertaken in Python Programming at CodSoft, from 28th May 2026 to 28th June 2026. The internship was designed to provide hands-on, project-based exposure to core and applied concepts of Python, allowing interns to strengthen their programming fundamentals while working on real-world style tasks and projects.

Python was chosen as the focus area of this internship due to its versatility, readability, and widespread use in fields such as web development, data science, automation, and artificial intelligence. Through this internship, an effort was made to translate theoretical classroom knowledge into practical, applied skills.

2. About the Organization

CodSoft is an organization that offers virtual internship programs to students across various technology domains, including Python Programming, Web Development, Data Science, Android Development, and Artificial Intelligence. CodSoft is recognized as an ISO 9001:2015 certified organization and is registered under the Ministry of Micro, Small & Medium Enterprises (MSME), Government of India. The organization focuses on providing students with practical, project-based learning experiences that help bridge the gap between academic knowledge and industry requirements.

3. Objectives of the Internship

- To gain practical, hands-on experience in Python programming beyond classroom learning.
- To strengthen understanding of core programming concepts such as data structures, control flow, functions, and object-oriented programming.
- To develop small, functional Python applications and tools as part of guided project tasks.
- To improve problem-solving, debugging, and logical reasoning skills.
- To understand how independent, self-paced project work is structured and completed within a fixed timeline in a virtual/remote environment.

4. Duration and Mode of Internship

Organization	CodSoft
Domain	Python Programming
Mode	Virtual Internship
Duration	4 Weeks (28/05/2026 to 28/06/2026)
Student Name	Dhruv Bhati
Program & Semester	B.Tech (CSE), 4th Semester
University	IILM University, Greater Noida

5. Work Undertaken

During the four weeks of the internship, tasks were assigned on a rolling basis, allowing flexibility to learn and implement concepts independently. The work undertaken broadly covered the following areas:

- Python Fundamentals: Revisiting and strengthening core syntax, data types, loops, and conditional statements.
- Functions and Modules: Writing reusable functions and organizing code using Python modules.
- Data Structures: Working with lists, dictionaries, tuples, and sets to manage and manipulate data efficiently.
- Object-Oriented Programming: Implementing classes and objects to build structured, maintainable programs.
- Mini Projects: Developing small command-line based Python applications such as calculators, to-do list managers, and simple automation scripts to apply concepts learned.
- Debugging and Testing: Identifying and fixing logical and runtime errors, and testing programs against various input scenarios.

6. Learning Outcomes

The internship provided several valuable learning outcomes that go beyond technical skill development:

- A stronger command over Python syntax and its practical application in building working programs.
- Improved ability to break down problems into smaller, manageable components before coding.
- Better debugging skills and a more systematic approach to identifying and resolving errors.
- Experience in managing time and deliverables independently in a self-paced, remote work setting.
- Increased confidence in taking up new programming challenges and learning new concepts independently.

7. Conclusion

The four-week virtual internship in Python Programming at CodSoft proved to be a valuable and rewarding experience. It offered an opportunity to move beyond theoretical learning and apply Python concepts to practical, hands-on tasks. The exposure gained during this internship has strengthened both technical proficiency and problem-solving ability, and has laid a strong foundation for future academic and professional pursuits in the field of computer science and software development.

Overall, the internship experience at CodSoft has been instrumental in bridging the gap between classroom learning and real-world programming practice, and is expected to be a valuable addition to the academic journey at IILM University, Greater Noida.
